

Option to edit session task to correct the Mapping attached

Dear Infa team,

I guess this will be a great idea to provide the option to edit the session task to link to the proper Mapping. Currently if by mistake we attach the session with the wrong mapping and check in, there is no direct way to correct the Mapping.

Hence I feel if we provide an option in the Edit Session General Tab or so, it will be of a great help.

Thanks,
Amitesh
